

MEETING REPORT - 08

Team Name: PMS Date of Meeting: 17.04.2018

Start Time: 10:30 End Time: 12:30

Meeting Location: Epoka University Library

Moderator: Sara Qirko Recorder: Ariola Lami

Other Members Present: Kejda Balla

Ilvana Dollaroviq

Members Absent: _____

Topics Discussed:

We discussed about the communication channel between the polyclinics and the hospitals. It was suggested to use QR codes for each patient that would be used to exchange personal information and medical records; however the other group (working on the hospital management system) did not agree to use that. They have designed their system in such a way that the doctors of the polyclinic should also have an account in their system, in order to log in, upload a file and leave an appointment for their patients. Our group thought this is an inefficient solution, because it means that each doctor should have an account in each hospital or polyclinic management system. But the other group had already started working on their project and changing their idea would change their overall design; therefore we had to agree with this solution, even if we didn't think it was a good solution. The only change that we agreed to make was that the upload of the file would be done by the receptionist of the polyclinic, in order not to have many duplicated accounts.

Decisions Made:

1. We should edit some user scenarios, use cases and use diagrams according to the latest changes made in our project idea about the exchange of the information for a specific patient between the polyclinics and hospitals.

Tasks Assigned:

1. Ariola will revise use diagrams.
2. Ilvana will revise user scenarios.
3. Kejda will revise use cases.
4. Sara will revise and make the necessary changes in user scenarios, use cases and use diagrams after the members listed above finish their work.

Time, Place, and Agenda for Next Meeting:

Next meeting: 02.05.2018, Epoka University Library

We will discuss about the changes in user scenarios, use cases and use diagrams that we have been working on and we will assign tasks for the following week.
