We were advised to add some functionalities in our software, for example statistics. We discussed the types of statistics that we could generate each month, in order for the director of the polyclinic to evaluate the situation and make some important decisions. We also decided that the patients of this polyclinic should be able to leave a feedback for the service. This feedback will be used to improve the service offered in the polyclinic. Related to diagrams, we discussed what we should change, based on the feedback of our professor for the last draft.

Decisions Made:

1. We should revise the software diagrams and make the necessary changes.
