MEETING REPORT - 05

Team Name: **PMS**   **Date of Meeting:** **03.04.2018**

Start Time: **11:00**   **End Time:** **13:00**

Meeting Location: **Epoka University Library**

Moderator: **Sara Qirko**   **Recorder:** **Ariola Lami**

Other Members Present: **Kejda Balla**

Ilvana Dollaroviq

Members Absent:

Topics Discussed:

As discussed before, one of the features of our software will be exporting a patient's file, containing his/her personal information and all his/her examination records. This file can be sent to another polyclinic or hospital, in case the patient decides to change the polyclinic or if he/she needs to take further examinations in a hospital. Since he/she already has a medical file, it would be easier, faster and more productive to send a digitalized copy that can be used from other polyclinics or hospitals.

Since another group in the class has decided to work on a hospital management system, we thought to collaborate and decide how we are going exchange these files. The leader of the MMS group, Xheni Vogli, communicated us the opinion that the members of her group have about this issue. They suggested that the doctors of the polyclinic should also have an account in their hospital management system. After exporting a patient's file from the polyclinic management system, the doctors can log in and import that file in their system.

We discussed the idea suggested above, and we came to the conclusion that it would not be an effective solution because that means that a single doctor should have an account in each hospital or polyclinic management system.

Decisions Made:

Each doctor having an account in every hospital management system or polyclinic management system is not an effective solution, therefore we should be thinking about other solutions regarding the communicating channel between polyclinics and hospitals for exchanging patients' files.

Tasks Assigned:

Every member of the group should be thinking about a possible communicating channel between polyclinics and hospitals.

Time, Place, and Agenda for Next Meeting:

Next meeting: 06.04.2018, Tirana Times Library
We will discuss about sketches and user scenarios/use cases.
